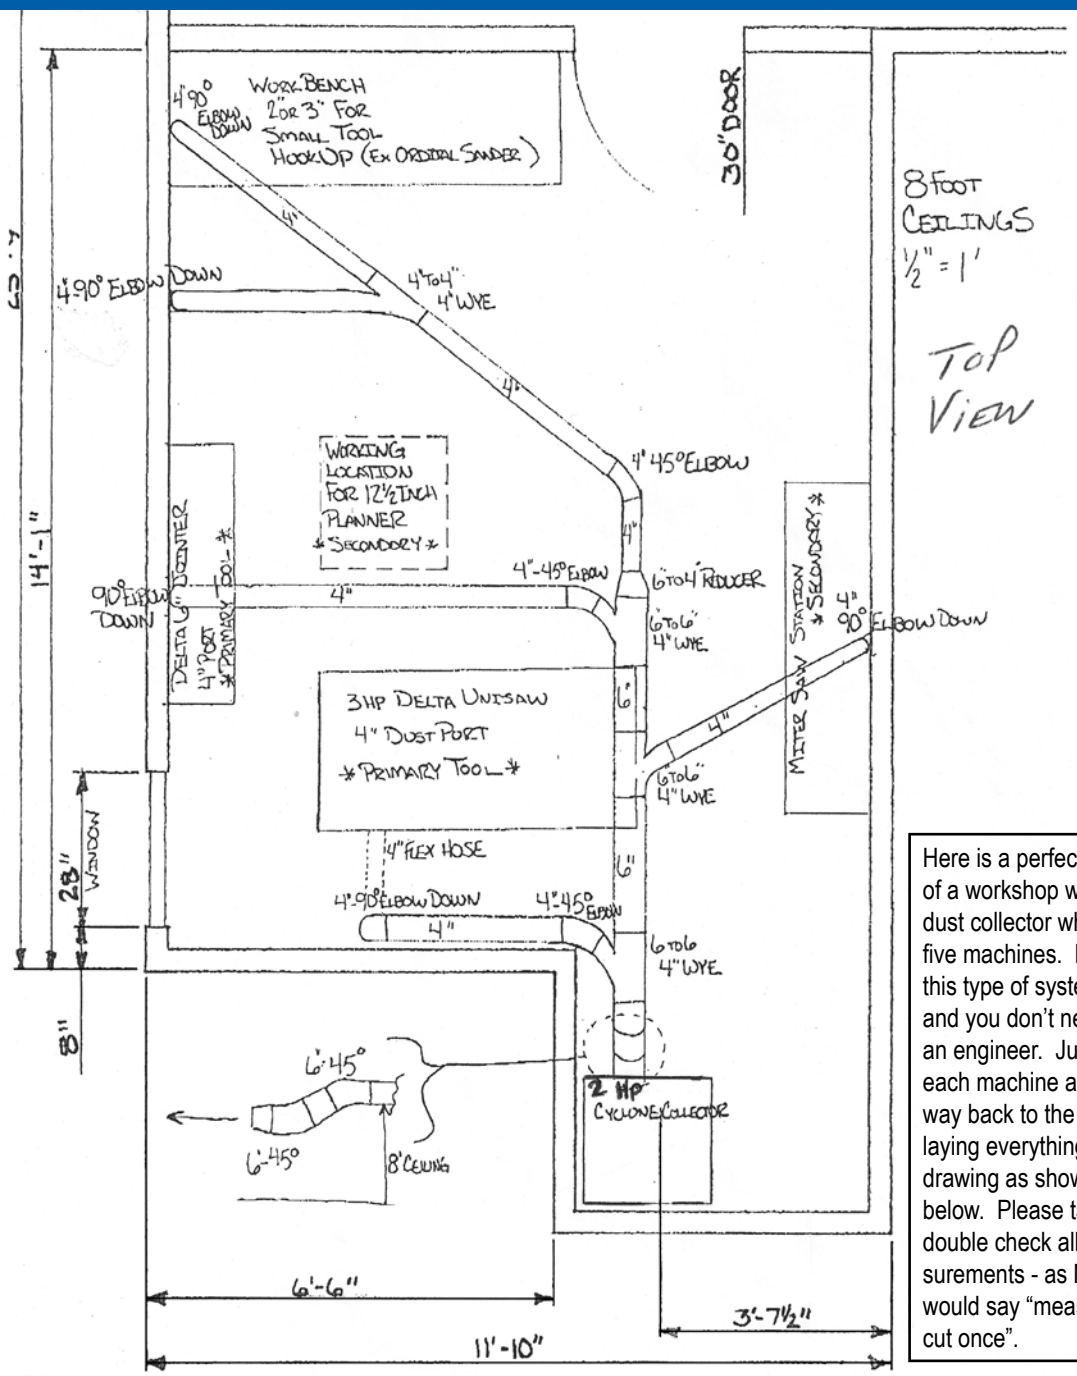
Workshop - 2HP Dust Collector



Here is a perfect example of a workshop with a 2HP dust collector which supports five machines. Layout of this type of system is simple and you don't need to be an engineer. Just start with each machine and work your way back to the collector laying everything out in a drawing as shown in the one below. Please take note to double check all your measurements - as Norm Abram would say "measure twice, cut once".

Due to market changes and fluctuations beyond our control, specifications and pricing subject to change without notice. Buyers subject to terms and conditions of sale. Many states and localities have codes and regulations governing sales, construction, installation and or use of Products for certain purposes, which may vary from those in neighboring areas. While Air Handling Systems by Manufacturers Service Co., Inc. attempts to assure that its Products comply with such codes, it cannot guarantee compliance, and cannot be responsible for how the Product is installed or used. Before purchase and use of a Product, please review the Product application, national & local codes, regulations, and be sure that the Product, installation, and use will be in compliance.
