SYSTEMS

Industrial Vacuum Hose for intermittent use

Air Handling Industrial Vacuum Hose and Kit is similar to a shop vac set up. The wands, nozzles, and flex hose are PVC. The kit was originally designed for intermittent clean up around woodworking machinery. It seems as of late, some of our customers are using the kit for general house cleaning and even dust collector enclosure clean up.

Prolonged use and high concentration of fine dust will create a static build up. For this application, a separate vac unit, groundable or antistatic hose, and aluminum wands and nozzles would be a better solution. Some of the vacuum units now available operate with compressed air. We recommend trying one of the vacuum unit and kit manufacturers such as Spencer Turbine, Nilfisk, or Invincible Vacuum.

Due to market changes and fluctuations beyond our control, specifications and pricing subject to change without notice. Buyers subject to terms and conditions of sale. Many states and localities have codes and regulations governing sales, construction, installation and or use of Products for certain purposes, which may vary from those in neighboring areas. While Air Handling Systems by Manufacturers Service Co., Inc. attempts to assure that its Products comply with such codes, it cannot guarantee compliance, and cannot be responsible for how the Product is installed or used. Before purchase and use of a Product, please review the Product application, national & local codes, regulations, and be sure that the Product, installation, and use will be in compliance.
