

Air Handling Systems Newsletter

keeping your environment clean
AUGUST 2010

Clean air, clean floor, and a clean environment!

Below you will find a YouTube video link showcasing The Eli Whitney Museum dust collection system. The Eli Whitney Museum, located in Hamden, CT is the birthplace of "the first American factory in 1798." It also features a remarkable educational program where over 70,000 projects are built every year by the students. We are proud to support such a valuable program helping them have clean air, clean floor and a clean environment.

IWF is quickly approaching. Those of you who are attending are going for a reason - to see the latest and greatest and we look forward to see you there. Please make plans to stop by and see us at Booth 5700, and learn about our show special!

We look forward to continuing to serve your air handling needs by helping you with clean air, clean floor, and a clean environment!

Jamison Scott

SUCK IT UP, AMERICA!

Clean air,
clean floor,
and a clean
environment
to face 2010!

[Video - The Eli Whitney Museum Dust Collection](#)

Focusing on improved dust collection functionality, the staff at The Eli Whitney Museum use our [QFD \(Quick Flexhose Disconnect\)](#) to make quick dust collection flexible hose connection changes.

The CNC is also featured, showing how effectively the [Ball Joint](#) combined with our [U30 flexible hose](#) helps to improve flexibility.
