keeping your environment clean

June 2010

### Nozzles - over 70% Price Cut

We have slashed pricing on Nozzles by 70%, on average. Nozzles are best utilized to get the capture velocity in close to your work area. This helps collect the majority of the dust or fumes. Designed with a small (male) end (O.D.) collar it easily attaches directly to flexible hose. Nozzles are constructed of 26 gauge galvanized metal, lap and spot welded.

Type 1 - Square

Type 2 - Side

Type 3 - Flat

### Video of manufacturing a Multi-tap Manifold

Check out our [Tech Data page to watch a video](#) on the manufacturing process of a airtight, fully welded multi-tap manifold.

On a daily basis we manufacture manifolds for molders as well as many other machines. Many larger sanders being manufactured today require a similar type of manifold.

For more info [click here for Tech Data](#) on Manifolds.

### IWF Atlanta

See us at Booth 5700. We have been exhibiting at IWF (International Woodworking Fair) since 1982 and look forward to seeing many of you there again this year. With over 800 exhibitors it's a great time to start your plans to attend the largest woodworking show of the year!

Make your plans and add Air Handling Systems, booth 5700 to your MUST SEE list.
