Static Electricity

When you need an Air Handling System, who do you call? Well, Norm Abram, and Tom Silva from This Old House had just that problem when they were building a new workshop as part of an estate-remodeling project in Milton Mass. Having provided technical support and components for The New Yankee Workshop, Russell Morash, Executive Producer, recommended Air Handling Systems come back again to provide the dust collection system for this new shop.

Manufacturing Reinvestment Account Act of 2010

Are you a manufacturer? A local manufacturer came up with an idea to allow manufacturers to save

money in a savings account like an IRA. Jamison Scott, Corporate Officer, Air Handling Systems took the idea to his Congresswoman Rosa DeLauro who understood the value for manufacturers and he worked with her staff to write a bill, HR 6025 called [The Manufacturing Reinvestment Account Act of 2010](#).

This bill would enable manufacturing businesses to establish a manufacturing reinvestment account (MRA), very similar to the well-known individual retirement account (IRA), at local community banks and to make annual contributions of up to \$250,000 over a period of five years. Those funds could then be used for the purchase of equipment and facilities, job training, and workforce development. If a business was to meet the \$250,000 limit of investment each year, and their account bears a five percent interest rate, they would have an after-tax balance of approximately \$1.2 million after five years.

For more information contact Jamison at jscott@airhand.com.

IWF Show Special extended to all.

FREE Installation Pack on your next order of \$500 or more. Many thanks to all who stopped by the visit us at IWF. With such great response we wanted to extend our show special to all our valued customers.
