INDUSTRIAL STRENGTH
Ductwork Direct
November 2014

Ductwork Doctor

Will your spiral pipe stand up to the elements outside for a year?

Yes, our galvanized spiral pipe will hold up outdoors, for many, many years. In 1990, we installed 18-inch diameter 22-gauge spiral pipe up-blast stack caps for our welding booths and they are still in good functional use today.

One important note, if the spiral pipe is being installed vertically, you want to ensure the closed side of the seam is up. The open side is actually a fine line because the seam is pressed so tight, but the seam is air tight and not actually so called "water tight." Please check our [Allowable Negative Pressure Chart](#) for spiral pipe. This way you can determine the proper gauge according to diameter and negative pressure in inches of water gauge.

Curt Corum,
Sales Manager

Manufacturing in action Multi-tap Manifold

Air Handling Systems Manifold

Air Handling Manifolds are for optimum airflow. Our Manifolds are fabricated to industrial standards including being fully welded creating an airtight seam for optimal performance. Others styles have terribly inefficient airflow and require additional ceiling height.

On a daily basis we manufacture manifolds for edgebanders, sanders and moulders as well as many types of equipment.

We can easily provide a quote on a multi-tap manifold. The combinations are limitless due to the various machinery configurations and placements. [CLICK HERE](#) to

view document detailing our multi-tap manifolds and how to submit your request for quote.

Holiday Schedule

As the Holidays season is almost upon us, we wanted to provide you with some important dates.

November/Thanksgiving - We will be closed November 27th and 28th.

December/Christmas - We will be closed December 25th and 26th.

January/New Years - We will be closed January 1st & 2nd.

Please plan accordingly as we will do our best to meet your needs, but cannot control the holiday shipping schedule and rush via the various carriers. For example UPS will not be picking up on Wed 12/24 or Wed 12/30.

Flexible Hose

Air Handling Systems stocks 15 different types of flexible hoses from 2"-12" in diameter all Made in USA.

Click here to see our online selection. If you

don't see the hose you need, let us know and we can tap our extensive network to find the correct hose for your application.
