Shipping Spiral Pipe

Can you ship me just 3, 10 foot lengths of 6" spiral pipe?

Yes we can, but it is not practical. It is far more reasonable to simply ship 6, 5 foot lengths. Ten foot lengths of spiral pipe must ship via LTL common carrier; i.e., ABF, YRC, Estes, Fedex Freight. It is absolutely critical that the 10 foot lengths are crated for transport. The spiral pipe crates we manufacture are very sturdy and the crating charge is less than cost. The maximum distance the crates can be shipped is Central United States. For Mountain and Pacific time zones, we are able to ship our 5 foot pipe lengths. Our experience tells us, pipe crates just won't make it that distance without the possibility of damage.

Customer Focus Improved Airflow and Machine Access

Before

As stated from our customer. "Our goal was to streamline the hoses so that we could get easy access to the back side of the sander. Our intention is to build a platform over the hoses, but in the meantime, the manifold has already made it easier to walk around the machine and has almost certainly improved the dust collectors performance as well."

The real issue is weight of the spiral pipe in the crate. In order to obtain a good shipping rate, a minimum of 300 lbs of pipe is required. This is necessary due to the physical size of the pipe crate. If we are taking up that much space in the trailer, the weight creates a minimum density factor. Otherwise, shipping class and shipping charge will increase substantially. Can we ship 3, 10 foot lengths of spiral pipe to Alabama? Certainly, we can, however the shipping cost will be astronomical! On our web site, www.airhand.com, in the technical data section, you can find the weight per foot for spiral pipe. This will enable you to make a determination as to whether it is practical to ship 10 foot pipe lengths.

Our 5 foot pipe lengths ship in a large carton on pallet. We are able to ship these cartons all across the United States as well as international. The 5 foot pipes ship nested.

Air Handling Catalog

2016 Air Handling Systems catalog is now available. To request your free copy please call 800-367-3828 or email sales@airhand.com.

Got Dust? Need Hose?

Fittings and hoses are packaged in independent boxes with packing and are placed alongside the spiral pipe. In some instances, a piping system may warrant up to 10 of these cartons on pallets. Excellent freight rates are normally applied to this shipping method. It is always our ultimate objective to ship the most cost effective manner while minimizing the possibility of damage in transit.
