October 2015

### Products in Action - Woodsound Studio

Not only a woodworker, but a Luthier.

Many of our customers are woodworkers, fine crafters of cabinets to mass producers of picture frames, but a Luthier is a rare, extremely talented and gifted craftsman; one who not only works with but also creates amazing music with their hands. One that builds a perfectly balanced instrument and can then teach one how to play; meet the craftsman, the teacher, the musician, Ron Pinkham, who also happens to be a customer of Air Handling Systems.

Upon touring the workshop, one comes to appreciate the expertise and talent that goes into creating the extraordinary acoustic stringed instruments that are being handcrafted.

A handmade Pinkham guitar from Woodsound Studios might set you back a down payment on a small home, but for those that have the opportunity to invest in such a fine instrument know there is nothing better, just ask Don Mclean.

The staff of Air Handling Systems is pleased to be able to provide as Don describes "superior" products for his new dust collection system in his newly expanded manufacturing facility in Lincolnville, Maine.

### Proper Planning Checklist

## Proper Planning

### New Machine Check List:

- 1. Sufficient voltage
- 2. Necessary floor space
- 3. Staff time for setup
- 4. Safety Program
- 5. Dust Collection\*\*\*

\*\*\*Air Handling Systems is your source! Unfortunately dust collection is frequently put on the back burner. This is an important factor for proper machinery set up. These details should be addressed with a priority. Dust collection affects the work environment as well as the workers and finished product.

Let us help you with Dust Collection and check the box. Call for our FREE catalog or visit us online at [www.airhand.com](http://www.airhand.com)

Due to market changes and fluctuations beyond our control, specifications and pricing subject to change without notice. Buyers subject to terms and conditions of sale. Many states and localities have codes and regulations governing sales, construction, installation and or use of Products for certain purposes, which may vary from those in neighboring areas. While Air Handling Systems by Manufacturers Service Co., Inc. attempts to assure that its Products comply with such codes, it cannot guarantee compliance, and cannot be responsible for how the Product is installed or used. Before purchase and use of a Product, please review the Product application, national & local codes, regulations, and be sure that the Product, installation, and use will be in compliance.
