**INDUSTRIAL STRENGTH
Ductwork Direct**

November 2016

Products in Actions

Each month we supply hundreds of companies throughout the country with ductwork to handle a wide array of dust and fume collection issues. This month we showcase two of our serious woodworking hobbyists from Oregon to Ohio.

Serious Hobbyist

A serious hobbyist who happens to be a retired aerospace engineer has done a superb job designing and installing his dust collection system. Located in Bend, Oregon, our customer first inquired four years ago in November 2012. By January 2013 he said, "Thanks folks but I won't be buying for several years. Just doing my pre-planning for my new shop." Four years later, this month, November 2016, he installed his system. We are happy to work with customers that take their time in ordering to customers who need products shipped next day. It is all in the diversity of our customer base.

Ohio Woodworking Hobbyist

In March, this customer first contacted us. "I am building a work shop that includes a

2 hp Jet cyclone dust collector located in the attic. I plan to come down through the attic floor into the work shop and then span out to 2 or 3 inlets. I will be traveling from Ohio to Massachusetts by way of Connecticut and want to pick up this material." Two weeks later he arrived to pick up his ductwork. With the holiday's just weeks away, he will be stopping again on his way to visit his family and picking up some flexible hose to finish up his final connections.

Want us to showcase your dust or fume collection system?

Air Handling Systems Expands Product Line **NEW** Clamp Together Ducting

For decades, Air Handling Systems has manufactured and supplied high quality industrial spiral pipe and welded fittings for large dust and fume collection systems. We have now expanded our product line to offer the Clamp Together Duct System.

Air Handling Systems is the only company that provides a full range of ALL types of duct work to handle all your industrial ventilation

Like/Follow/Pin us

needs. Easily connects to your existing system or connect your Clamp Together System to our spiral pipe. The Clamp Together Duct System uses a barrel-type clamp to attach two rolled edges of ducting together. Clamp each piece together without any special tools. Pipe is laser welded, clamp together collars are added to our fully welded, air tight fittings.
