**INDUSTRIAL STRENGTH
Ductwork Direct**
October 2016

Products in Actions

Each month we supply hundreds of companies throughout the country with ductwork to handle a wide array of dust and fume collection issues. This month we showcase one right here in our home state of Connecticut as well as one 2,600 miles away in Arizona.

Connecticut Manufacturing

Long time customer Jim Shea with AER Refurbished Systems installed a specially designed dust collection system for a Connecticut based manufacturer specializing in stain removal.

Kris Kraft Cabinet Company, Yuma, AZ

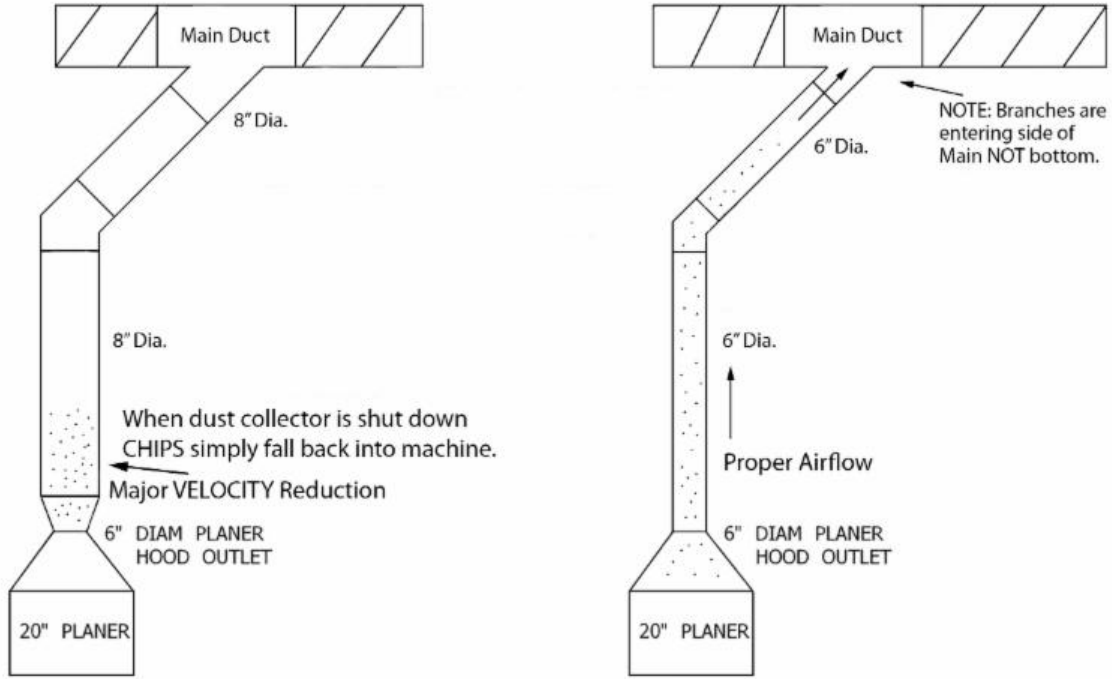

When Chris Strebe, from Kris Kraft Cabinet Company, Yuma, AZ needed help in 1995 he called Air Handling Systems. Over 20 years later we are proud to be able to continue to help Chris as he invests in new technology and continues to grow his business.

Velocity Drop

We are finding more and more customers coming to us with drawings from competitors that simply lack common sense or a basic understanding of air flow. As detailed in the diagram below enlarging from a 6" to 8" in the branch will actually impede airflow to the main duct by suspending dust and chips in the branch and not allow it to travel to the collector. In many cases causing the dust to lay in the duct work or worse fall back to the machine. The problem is these customers look to the dust collector suppliers to help and in some cases do not understand they are being misinformed on basics such as velocity.

have now expanded our product line to offer the Clamp Together Duct System.

Air Handling Systems is the only company that provides a full range of ALL types of duct work to handle all your industrial ventilation needs. Easily connects to your existing system or connect your Clamp Together System to our spiral pipe. The Clamp Together Duct System uses a barrel-type clamp to attach two rolled edges of ducting together. Clamp each piece together without any special tools. Pipe is laser welded, clamp together collars are added to our fully welded, air tight fittings.
