**INDUSTRIAL STRENGTH
Ductwork Direct**

September 2017

Look at what **YOU** can do with Air Handling Systems products...

**Multi-Tap Manifold (7 taps),
used with an edgebander.**

**Multi-Tap Manifold (13 taps),
shipped in two pieces, once connected over 16 feet long.**

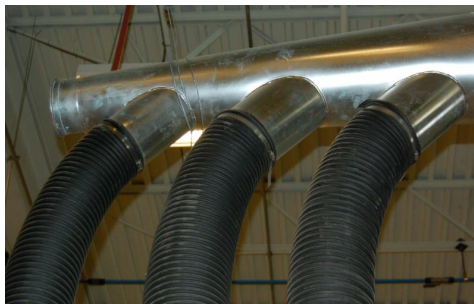

And how it was manufactured...

Manifold Manufacturing Process

Recently, we manufactured a multi-tap manifold 27 feet long with 16 taps and another manifold 19 feet long with 14 taps.

...think what we can do for you!

On a daily basis we manufacture **manifolds for edgebanders and moulders** as well as many other types of equipment. Many larger sanders being manufactured today require a similar type of manifold. To receive a quote for a multi-tap manifold simply **[click here to download manifold data sheet](#)**.

Contact Air Handling Systems for all your ducting needs as well as to find the proper **flexible hose** to replace the old damaged, improper, leaking and duct taped hose. Now your hose can function like new with no leaks! Call 800-367-3828 or go to www.airhand.com for more information.
